

# AN ELEPHANT NEVER FORGETS

**FAMILY** MOST CLOSELY BONDED ON EARTH. MOTHERS, DAUGHTERS, AUNTS, COUSINS STAY TOGETHER FOR LIFE.

**HOME** LUSH FORESTS, ROLLING SAVANNAHS, WATERING HOLES, MUD BATHS, WIDE OPEN PLAINS.

**TRAVEL** 30 TO 50 MILES A DAY ACROSS DIVERSE TERRAIN IN SEARCH OF FOOD, FRIENDS AND COMFORT.

**LONG LIFE** 60 TO 70 YEARS. LIKE HUMANS, LIVE LONG PAST REPRODUCTIVE YEARS. WISDOM OF ELDERS ESSENTIAL TO SURVIVAL OF THE HERD.

## IT'S TIME TO GIVE IT BACK

Taken from the wild as babies, Juno and Savannah have lived for years in the El Paso Zoo's barren, less than 1-acre enclosure. They've endured zoo-induced neurotic behavior (constant rocking and swaying), infertility, foot infections, painful arthritis and digestive disorders.

We can't send them home, but we can give them the next best thing: The Elephant Sanctuary in Tennessee offers 1400 acres of rolling hills and forests in a natural setting where Juno and Savannah can be elephants once again.

## WHAT CAN YOU DO?

### ■ CALL YOUR CITY COUNCIL REPRESENTATIVE

BY JULY 27 AT (915) 541.4000. Urge them to vote YES to send Juno and Savannah to The Elephant Sanctuary.
