<u>Date in</u>	<u>Acquisition - Vendor/local Id</u>	<u>Holder</u>	<u>Disposition - Recipient/local Id</u>	<u>Date out</u>
19 Jul 1971	Purchase from ABILENE / UNK	KANSASCTY / 116		

<u>Date</u>	<u>Note type</u>	<u>Comments</u>
26 Mar 2007	Physical condition	Diarrhea found on exhibit; keepers witnessed it at 2pm feeding. Acting fine, sample to AHC.
14 Jun 2007	Physical condition	Acting off after seeing light, did not finish grain or eat hay. Turned lights off and she started eating.
21 Jul 2007	Individual behavior	Did radiograph training -- she started acting odd and unresponsive. Her eyes were rolling back and she was falling asleep, then jerking back awake. DVM collected feces & urine.
22 Jul 2007	Physical condition	Seems fine today; eating and appears normal. Received Synovicre.
9 Aug 2007	Medical observation	Annual exam: eyes, ears w/ culture, oral, vulva & mammary, conformation. Fecal, urine, & blood samples. Feet exams & Radiographs -- all except RR.
24 Oct 2007	Medical treatment	Received Synovicre; checked ears and applied bag balm.
7 Jan 2008	Physical condition	Ear edges looking good. Blood drawn (14cc).
6 Feb 2008	Physical condition	Passed a 5 ft. piece of twine today. Acting off; falling asleep and jerking awake. Cocking/turning head to the Right and appears to be in a daze. Eating & drinking but still more grumpy and aggressive in the past week. DVM checked here eyes, no twitching.
7 Feb 2008	Physical condition	Again nodding off, jerking awake, all legs buckling, & tilting head toward the Left in AM. Blood drawn.
8 Feb 2008	Note	She seems fine today. All cows outside today; monitored Penny throughout day.
13 Feb 2008	Medical treatment	Synovicre in AM -- Began her on 30 tabs Ibuprofen (800mg ea.) 2x daily until further notice. // Also did Blood Pressure Cuff training today
17 Feb 2008	Physical condition	Seems to be moving fairly well -- gets down in holes in yard, scratching on walls, etc. (Synovicre IC.)
19 Feb 2008	Physical condition	Falling asleep, & jerking awake.
21 Feb 2008	Fecal observation	Loose stools from overnight. Received normal Synovicre tabs (AM & PM).
25 Feb 2008	Physical condition	1C Synovicre -- 30 tabs Ibuprofen AM & PM. Found a chunk of thick discharge in overnight stall -- mucous plug?
26 Feb 2008	Human interaction	Blood Pressure Cuff training today.
3 Mar 2008	Physical condition	Normal IC Synovicre and Ibuprofen. Appears to be nodding head & having loss of balance in AM. Refused PM meds. Also did Blood Pressure Cuff training today, she did well.
6 Mar 2008	Human interaction	Blood Pressure Cuff training yesterday and today.
6 Apr 2008	Human interaction	Blood Pressure Cuff training.
1 May 2008	Behavior note	Acting abnormal -- not eating hay, and drinking much water. While drinking water from pool & digging in mud she was kicking her belly hard with front feet.
1 Jun 2008	Medical treatment	She is still currently receiving 30 tabs Ibuprofen daily S.I.D. per DVM instructions (and Synovicre in AM.)
31 Jul 2008	Medical observation	"Annual" exam: eyes, ears, mouth, vulva, conformation, sulcus checked, feet & pads (radiographs of 3 feet -- couldn't get R-R). Took 24cc blood, also fecal sample for analysis.

Date in	Acquisition - Vendor/local Id	Holder	Disposition - Recipient/local Id	Date out
17 Sep 1982	Purchase from FERNDAL / UNK	KANSASCTY / 1669		

Date	Note type	Comments
25 Mar 2007	Medical note	Continued sulcus treatment, small amounts of pus seen some days.
2 Apr 2007	Physical condition	Continued sulcus treatment, today 3 quarter-sized pieces of pus came out.
7 May 2007	Physical condition	Pus in stall from overnight; none during flushing.
24 Jul 2007	Animal management note	Sulcus treatments continued, small amount of pus seen today.
1 Aug 2007	Medical observation	Annual exam: eyes, ears w/ culture, vulva, conformation, feet & pads. Fecal, urine, & blood samples.
3 Aug 2007	Medical procedure	Blood Pressure taken (meant to be done during annual exam 2 days ago).
14 Aug 2007	Human interaction	Working on "Shake" training currently.
4 Sep 2007	Physical condition	Sulcus treatments; several stringy pieces ~ 2" long. Also drew blood.
8 Sep 2007	Physical condition	Normal sulcus Tx; some pus. // Has 3 minor cuts on Rt. side of rear hindquarters.
13 Sep 2007	Physical condition	Normal sulcus Tx; no pus. // Has 3 scrapes on Left side and several on face; 1 deeper cut on face / front of trunk. DVM applied ointment.
15 Sep 2007	Medical treatment	Flushed trunk wound with Hydrogen peroxide as instructed by DVM.
16 Sep 2007	Physical condition	Trunk is still extra warm; Lea is rubbing and blowing dirt and hay at it.
18 Sep 2007	Human interaction	Worked with Lea on Tetanus training. Trunk wound still slightly warm and swollen; flushed with Hydrogen peroxide in PM.
21 Sep 2007	Physical condition	DVM checked trunk wound, applied nitro-ointment in wound. New treatment starts tomorrow.
26 Sep 2007	Medical treatment	Continued treatment to trunk wound and sulcus.
4 Oct 2007	Physical condition	Trunk wound treatment (2x). Fibrin chunk came off, looks good. Sulcus Tx in AM only.
8 Oct 2007	Physical condition	Appears to be a bit bloated on Left side, DVM informed. Given mineral oil; will recheck soon.
10 Oct 2007	Medical treatment	LAST day of 93 caps TMZ/SMZ meds. Normal trunk wound Tx and Suture Tx.
5 Nov 2007	Medical treatment	Continued medical treatment to sulcus.
2 Dec 2007	Physical condition	Normal sulcus Tx -- 3 large chunks and several smaller pieces of pus. // Has 2 scrapes below each eye, & 1 scrape on RF leg, due to sparring with "Zoe."
3 Jan 2008	Eye condition/treatment	Worked on training for Atropic Eye Study.
4 Jan 2008	Eye condition/treatment	Worked on training for eye drop study.
7 Jan 2008	Eye condition/treatment	Worked on training for Atropic Eye Study, both eyes.
8 Jan 2008	Eye condition/treatment	Tried eye drops in Left eye -- no dilation seen by PM.
8 Feb 2008	Adult/adult behavior	Lois & Lea broke chain on yard door 3, and got in with Zoe. Mostly minor scrapes produced on Lois & Lea. Zoe had 2 scrapes on her back near spine, and was slightly stiff on RR leg. Lea also had a cut under Left eye and inside Right sulcus.
11 Feb 2008	Medical treatment	Normal sulcus Tx -- small chunks of pus.
2 Apr 2008	Fecal observation	Today Lois and Lea both had twine in their bolus. (Yesterday Megan & Tattoo had same twine in bolus.)
3 Apr 2008	Physical condition	Normal sulcus Tx. Appears very bloated, but fecals looking good. DVM checked -- Rx: 5 gal. Mineral Oil, and 2 tubes Flanaxine. Lea ate only one of the tube amount of Flanaxine.
6 Apr 2008	Physical condition	Normal sulcus Tx; several small chunks of pus. Still appears bloated, fecals look good with oily sheen.
7 Apr 2008	Fecal observation	Found twine in her bolus again.
17 Jul 2008	Medical observation	"Routine" exam: eyes, ears, mouth, vulva, conformation, sulcus checked, feet & pads (radiographs

21 Jul 2008

Foot/Hoof condition

of all 4). Took 24cc blood, and tried to get Blood Pressure.

RR foot has deep hole in pad found during footwork -- need to monitor.

17 Sep 1982	Purchase from FERNDAL / UNK	KANSASCTY / 1670		

<u>Date</u>	<u>Note type</u>	<u>Comments</u>
13 Apr 2007	Physical condition	Has edema along belly on left side.
31 May 2007	Medical treatment	Last day for TMZ capsules.
1 Jun 2007	Physical condition	Lifting right rear leg better, looks good. Discontinuing medication per DVM.
23 Jul 2007	General activity	Moving very slow in PM and eating grain slowly. Left some grain also.
1 Aug 2007	Medical observation	Annual exam: eyes, ears w/ culture, vulva, conformation, feet & pads. Fecal, urine, & blood samples. Also took blood pressure.
29 Aug 2007	Physical condition	Clear discharge seen after urination. Then noticed "pea" sized bumps on vaginal folds.
31 Aug 2007	Physical condition	Checked vulva in E.R.D. and found one pea-sized lump. She was also dripping clear discharge in PM; sample to AHC.
15 Sep 2007	Eye condition/treatment	Left eye had thick white discharge all around it in AM; gone by PM.
17 Oct 2007	Physical condition	Skin swollen around tail area. DVM checked, will monitor it.
19 Oct 2007	Physical condition	Sphincter/tail area looks better; still a bit puffy or squishy.
24 Oct 2007	Physical condition	Rear-end/sphincter area looks unchanged as of today.
3 Jan 2008	Physical condition	Edema is still large and even appears possibly bigger.
3 Jan 2008	Eye condition/treatment	Worked on training for Atropic Eye Study.
7 Jan 2008	Physical condition	Edema area is changing shape; but still large.
8 Feb 2008	Adult/adult behavior	Lois & Lea broke chain on yard door 3, and got in with Zoe. Mostly minor scrapes produced on Lois & Lea. Zoe had 2 scrapes on her back near spine, and was slightly stiff on RR leg. Lea also had a cut under Left eye and inside Right sulcus.
6 Mar 2008	Introduction Note	Zoe introduced to Lois, Penny, & Tattoo in Big Yard - went okay; Lois pushed Zoe around a bit.
2 Apr 2008	Fecal observation	Today Lois and Lea both had twine in their bolus. (Yesterday Megan & Tattoo had same twine in bolus.)
23 Jul 2008	Medical procedure	"Routine" exam: eyes, ears, mouth, vulva & mammary glands, conformation, sulcus checked, feet & pads (radiographs of all 4). Took 24cc blood, and did Blood Pressure. Attempted to radiograph R-R knee, but technical difficulties prevented it - Lois was great!
28 Jul 2008	Physical condition	Has several golf-ball sized rough raised spots on center, middle, and Left side of her back; callous-like.
28 Jul 2008	Adult/adult behavior	Lois blocked Zoe from going onto exhibit today.

<u>Date</u>	<u>Note type</u>	<u>Comments</u>
18 Mar 2007	Physical condition	Acting like in pain, gave flinixon – took about half dose. After rubbing and rolling around noticed blood from incision.
25 Mar 2007	Medical note	Continued treatment to surgical site, flushing and applying ointment daily.
27 Mar 2007	Medical procedure	Procedure in AM to suture previous procedure site. Not interested in food in PM, no bowels or bolus passed by 10 pm. T. Kara checked her at 2AM.
28 Mar 2007	Physical condition	Eating and drinking well, all sutures in place. Fairly normal bowel movements.
1 Apr 2007	Physical condition	Continued treatment to surgical site in AM and PM.
2 Apr 2007	Medical note	DVM prescribed new medication (TMZ capsules). She is beginning to scratch at surgical site.
4 Apr 2007	Physical condition	Rubbing procedure site a lot, appears 3rd suture from top is starting to break but rest seem to be fine. DVM checked and reported that the mucosa layer seems to be broken
6 Apr 2007	Physical condition	Appears that 2 sutures are broken, DVM checked.
16 Apr 2007	Medical procedure	Suture treatment – received 72 caps TMZ in AM.
1 May 2007	Physical condition	White discharge -- larger piles noted.
4 May 2007	Medical procedure	Suture treatment. Much discharge today, one large pile had a small spot of blood visible.
27 May 2007	Note	Keepers found several more calf parts this AM which were passed by Lady; turned items over to DVM.
31 May 2007	Medical procedure	Suture treatment. Discharge had blood in it today.
9 Jun 2007	Physical condition	Treatment of procedure site, standing in awkward position and straining to defecate. Left a small amount of diet.
10 Jun 2007	Physical condition	Acting the same as yesterday, DVM and 160 observed.
15 Jun 2007	Physical condition	Suture treatment, discharge seen. Mucousa layer appears better today, by PM looked like it was irritated.
19 Jun 2007	Physical condition	DVM did suture Tx. // Lady was swaying hard today; had piles of discharge which were pinkish in color with pink & white chunks. Blood specks in discharge were larger; has a smell to her this PM. Not cooperating for blood draw or hosing routine -- acting odd. DVM applied cream on mucosa layer.
2 Jul 2007	Medical procedure	Suture treatment. Small amt. of discharge.
6 Jul 2007	Medical procedure	Suture treatment (2x) – peeling skin on mucousa area.
7 Jul 2007	Medical procedure	Suture treatment (2x) -- two piles of discharge.
10 Jul 2007	Medical treatment	Suture treatment; no discharge observed for 3 days.
11 Jul 2007	Medical treatment	Suture treatment; small pile of clear discharge observed with only a few white chunks. DVM observed her stretch.
14 Jul 2007	Medical treatment	Suture treatment today and past 2 days.
19 Jul 2007	Medical observation	Annual Exam: eyes, ear exam & culture, oral exam, feet & pads, vulva, conformation, fecal sample, blood draw (17cc), blood pressure – still need to obtain urine.
25 Jul 2007	Medical treatment	Continued treatment of surgical site. Very small pile of clear discharge with some pink in it. DVM applied raw honey on area.
26 Jul 2007	Medical treatment	Continued suture are tx. DVM applies raw honey to mucosa at the point where it meets the skin.
2 Aug 2007	Physical condition	Clear discharge in bull stall & yard. Abrasion on upper Rt. side of mucosa in AM. Milky discharge seen in PM. Blood Pressure taken today.

Date	Condition	Treatment/Notes
7 Aug 2007	Medical treatment	Suture treatment; milky white discharge – thicker white discharge in PM.
8 Aug 2007	Physical condition	Suture treatment; thick white discharge with white chunks.
10 Aug 2007	Physical condition	Suture Tx, urine sample taken. Mucosa is pink and appears blistered (poss. sunburn); discharge found.
12 Aug 2007	Medical treatment	Suture treatment continues – 2x daily; some white discharge in stalls today and yesterday.
13 Aug 2007	Physical condition	Suture treatment (2x). Also more redness & blisters; some discharge. Applying honey to mucosa due to antibacterial properties (as have for past ~ month).
19 Aug 2007	Medical treatment	Suture treatment (2x) as usual – cream in AM, honey in PM. Backside smells of urine.
25 Aug 2007	Medical treatment	Suture treatment (2x) as usual – cream in AM, honey in PM. Much thick white discharge.
3 Sep 2007	Medical treatment	Normal AM hydro, flush & ointment on tail. PM hydro, flush, & honey; large amounts of thick white material – appeared to be squatting a few times and pushing discharge out. Possibly in estrus, doesn't appear to be in pain.
8 Sep 2007	Medical treatment	Normal suture Tx. Much discharge covering large portions of stalls 4, 5, & 6.
10 Sep 2007	Medical treatment	Suture Tx (2x); Hydro, flush & cream in AM & PM. (Discontinued honey in PM.) White discharge, several small piles.
11 Sep 2007	Medical treatment	Suture Tx (2x) -- large piles of white discharge.
26 Sep 2007	Medical treatment	Continued treatment to procedure site.
4 Oct 2007	Medical treatment	Suture Tx; under tail at top of incision site appeared a bit puffy.
5 Nov 2007	Medical treatment	Continued medical treatment to procedure site.
2 Dec 2007	Medical treatment	Continued medical treatment to (suture) procedure site – milky white discharge.
1 Jan 2008	Foot/Hoof condition	Treating both rear feet pads with Koppertox.
7 Jan 2008	Physical condition	Suture Tx; clear discharge with white chunks – two had small specks of blood. Sample to AHC.
9 Jan 2008	Medical treatment	Continuing with regular suture Tx (2), also Koppertox on feet in PM.
1 Feb 2008	Medical treatment	Continuing with regular suture Tx (AM & PM), and Koppertox on feet in PM.
10 Feb 2008	Foot/Hoof condition	Discontinuing Koppertox on RR foot pad. Will continue with it on LR pad.
23 Feb 2008	Medical note	Discontinuing Koppertox on LR pad. Also now applying Nolvasan to suture skin/mucosa layer per DVM.
2 Apr 2008	Physical condition	Suture Tx (AM & PM); thick white discharge with white chunks near discharge – a small speck of blood in discharge.
3 Apr 2008	Physical condition	Normal suture Tx AM & PM. Much thick white discharge today.
6 Apr 2008	Physical condition	(Normal 2 suture Tx.) She has a small cut on trunk. Large piles of thick white discharge.
1 May 2008	Physical condition	Acting off; swaying hard. Her boluses looked fine; will try obtain urine sample.
3 Jun 2008	Physical condition	(Normal 2 suture Tx.) Dripping clear thick discharge.
4 Jul 2008	Physical condition	(Normal 2 suture Tx.) // Eyes are bloodshot; and is urinating from suture site. Urine is extremely concentrated. Large amounts of discharge was passed overnight.
5 Jul 2008	Physical condition	Discharge present in stalls AM & PM. Urine still very cloudy.
6 Jul 2008	Physical condition	Thick cloudy discharge dripping from suture area.
15 Jul 2008	Medical observation	Annual Exam: blood pressure, eye & ear exam, oral exam, feet & pads (all 4 radiographed), vulva suture site, conformation, fecal & urine sample, blood draw (24cc), blood pressure. // Reluctant to let keepers (SM & PT) draw blood.
19 Jul 2008	Physical condition	(Normal 2 suture Tx.) Thick discharge with white chunks.

23 Oct 2007	House Name	ZOE		

<u>Date</u>	<u>Note type</u>	<u>Comments</u>
23 Oct 2007	Acquisition note	Received this date from Cameron Park Zoo on Breeding Loan. // Transported via truck by Ed Novak.
24 Oct 2007	Physical condition	Left rear leg appears to be wet, per RVT. Neither rear legs too swollen; looks good overall.
1 Nov 2007	Physical condition	Doing very well with general behaviors. // Received 3 full tubes of Ivermectin with produce due to soften stools.
3 Nov 2007	Physical condition	Appears to be straining while defecating. DVM checked, advised she seems fine; urine sample taken.
6 Jan 2008	Physical condition	Has round spot on back of Rt. ear which appears pinkish or otherwise discolored. No loose skin but it does feel rough.
3 Feb 2008	Human interaction	Working her in ERD -- today squeezed tight; touched sides then touched legs on Left side with straps.
8 Feb 2008	Adult/adult behavior	Lois & Lea broke chain on yard door 3, and got in with Zoe. Mostly minor scrapes produced on Lois & Lea. Zoe had 2 scrapes on her back near spine, and was slightly stiff on RR leg. Lea also had a cut under Left eye and inside Right sulcus.
10 Feb 2008	Human interaction	Continuing to work her consistently in ERD -- squeezed tight; touched with leg straps and fed.
12 Feb 2008	Human interaction	ERD strap training -- able to loop around LF leg and held hand tight. Zoe did very well.
13 Feb 2008	Dental Condition	Lower/bottom part of Right tusk is broken from the tip up into sulcus.
14 Feb 2008	Dental Condition	Today staff noted blood and possible pus today. Does not appear to bother her.
15 Feb 2008	Physical condition	Right sulcus on top is scraped and has dried blood inside & out; pus in sulcus. // Staff also found a rusty nail in stall from overnight.
27 Feb 2008	Medical note	Discontinuing rinsing of her sulcus.
1 Mar 2008	Physical condition	Has scrape on front of trunk.
5 Mar 2008	Physical condition	Sparring with Lady; cut on Left sulcus.
6 Mar 2008	Introduction Note	Introduced to Lois, Penny, & Tattoo in Big Yard -- went okay; Lois pushed Zoe around a bit. Zoe had few scrapes by end of day.
6 Apr 2008	Dental Condition	Appears to have chipped off more Ivory, a small amount on Rt.
1 May 2008	Human interaction	While staff attempted footwork, Zoe swung out and grazed keeper's head and also grabbed footrest. Crew decided to discontinue footwork at that time.
17 Jul 2008	Medical procedure	Given enema; then took Biopsies of rectal polyps (using ERD). Had a few small loose stools then a nice bolus; no blood seen.
18 Jul 2008	Physical condition	Slapping at stomach and throwing hay at stomach a lot today. Collected 15cc blood, sent to AHC.
24 Jul 2008	Medical observation	"Routine" exam: eyes, ears, mouth, vulva, conformation, mammarys checked, feet & pads (radiographs of all 4). Took 24cc blood, did urine & fecal analysis, and got Blood Pressure.
26 Jul 2008	Immobilization	Strapped her in E.R.D. -- tail tied, and palpated.
28 Jul 2008	Adult/adult behavior	Lois blocked Zoe from going onto exhibit today.
31 Jul 2008	Immobilization	DVM performed colonoscopy and associated biopsy on Zoe using E.R.D. -- she was "squeezed" and leg strapped.
